## Our products, Software and systems Services at RAZAQ Innovations

We at RAZAQ Innovation, offer end-to-end software development and mobile apps development services, by leveraging our strong domain expertise and skills in pioneering technologies. Lavasoft's application development process goes hand-in-hand with customers' business requirements for developing & customizing varied software applications that provide them the strategic advantage.

### Some of our specialized products/projects include Standard & custom software

1. Standard software is a ready-made system, available in the markets across the globe.
2. Custom software is developed by our technical team as per requirements of our customers, by following design, development and implementation steps.

Amongst many other we can supply the following standard systems

- **Timesheet Management Solution/System or project management**  
A system that enables employee to account for/charge their time spent in certain engagement/task/project, with multiple layers of approvals of the submitted timesheets as per entities policy. Cost element is also attached to the system, this will enable admin to assign hourly charge to each employee. Thus, actual cost of the assignment will be billed/determining by multiplying the actual time spent in executing the engagement and the hourly charge of each participant.
- **Enterprise Resource planning (ERP system)**-this is a comprehensive finance management system with over 50 modules such as Accounting, HR, payroll, Loan management, assets management, Insurance, petty cash requisition, procurement system.
- **Teammate Audit software**- As the world's leading audit management software, Teammate has revolutionized the audit industry, empowering audit departments of all sizes to spend less time documenting and reviewing and more time providing value-added services
- **Hospital/clinic Management system**
- **Stores/housekeeping management system**
- **Point of sales (POS) systems**
- **Human resource and Payroll system**
- **Accounting and finance system**
- **Purchases (procurement system)**
- **Budget control**
- **Petty cash requisition and Management**
- **Computer operating systems such as windows and iOS.**
- **Drivers and operating system for ICT accessories i.e printers, scanners.**
- **Supply of ICT Accessories, equipment and devices**
